Sponsoring “Summer School on Real-world Crypto and Privacy”, May 31- June 5, 2015, Sibenik, Croatia <http://summerschool-croatia15.cs.ru.nl/>

CONCEPT

Due to the big success of the Summer school on cryptography and physical security organized last year at the same place (more than 130 participants from academia and industry), we are planning the next edition of a summer school on “Real-world crypto and privacy” in June 2015. The purpose of the school is to attract again not just PhD students and PostDocs, but also industry people interested in recent development in cryptography. We plan to include lectures on Public-key cryptography and applications, State of the art for symmetric key crypto, Physical attacks, Lightweight cryptography and Secure HW. We plan hands-on sessions on SCA (by Riscure) and TRNGs in practice. The program will take 4 full days with plenary talks in the first 2 days followed by an excursion (on Wednesday). The last two days will cover most recent developments in several topics and will be split into two tracks (theory and practice).

ORGANIZATION

The school is jointly organized by the Digital Security (DS) group from Radboud University Nijmegen and the Faculty of Electrical Engineering and Computing (FER) Zagreb, Croatia.

ADDRESSED AUDIENCE

The event aims at bringing together PhD students, postdoctoral researchers and security experts from industry, interested in the following topics:

- Physical attacks and Countermeasures
- Symmetric-key crypto highlights
- Provable security
- Lightweight and Real-world cryptography
- Privacy and anonymity
- Secure implementations in hardware and software
- Mathematics of public-key cryptography
- Secure hardware, RNGs etc.
